

GENEVA FINANCE LIMITED

ANNUAL REPORT

MARCH 2017

ABOUT THE COMPANY

Geneva Finance Ltd (Geneva) is a New Zealand-owned finance company that provides finance and financial services to the consumer credit markets. Geneva commenced business on 7 October 2002. The company's loans are originated through three distribution channels (Direct, Broker and Dealer), processed by the central sales desk and administered through a national operations centre located at Mt Wellington, Auckland.

Geneva's principal activity is to lend to individuals during the course of carrying on its finance company business. A proportion of that finance is for individuals whose personal lending and finance needs are not adequately catered for by trading banks and/or because of the specific nature of the borrowing requirement e.g. secured fixed-term personal asset financing such as vehicle or retail hire purchase finance.

The company provides hire purchase finance, and personal loans secured by registered security interests over personal assets such as motor vehicles, and mortgages of residential property. As at 31 March 2017, the Receivables Ledger was \$94.6 million (prior to provisions for deferred revenue and doubtful debts and includes receivables held by the Geneva Warehouse A Trust and Prime Asset Trust gross receivables) spread over 10,210 loans, with an average loan size of \$9,800. This represents a wide spread of risk due to the large number and relatively small size of each loan. The net book value as at 31 March 2017 after provisions for deferred revenue and doubtful debts was \$64.01m.

The Geneva group of companies employs approximately 34 staff, based at its Mt Wellington Head office.

HIGHLIGHTS AND SIGNIFICANT EVENTS

Profit increase

The after tax profit for the March 2017 year increased by 45% to \$5.1m.

Ledger growth

The Group's gross receivable ledger grew by \$9.9m (12%) to \$94.6m at 31 March 2017. The growth was achieved while maintaining good asset quality and yields.

Funding

The receivable ledger growth was largely funded by the Group's securitization facility which grew to \$42.7m, a 15% increase from the prior year and \$3.1m from eligible investors.

Credit Rating

Credit rating agency AM Best confirmed Quest Insurance Group Limited's credit rating on 11 January 2017 with a Financial Strength rating of B and an Issuer Credit rating of bb. Both ratings came with a stable outlook.

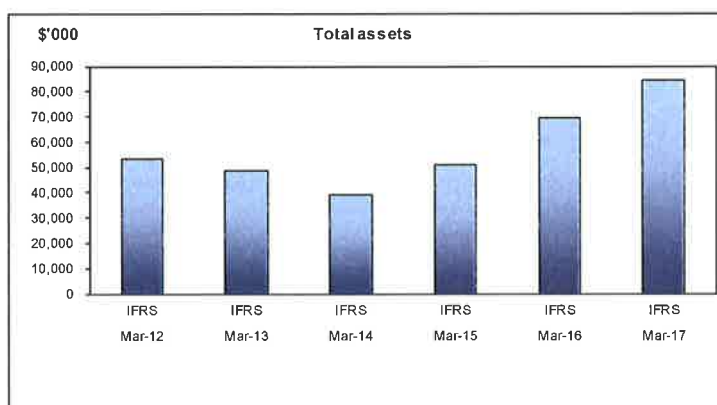

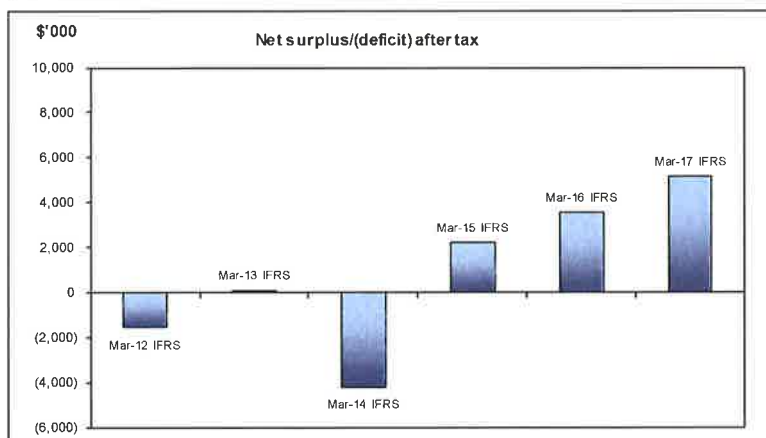

Events subsequent to balance date:

Quest Insurance Group Limited entered into an underwrite agreement with Janssen Insurance Limited effective 1 April 2017. On 14 June 2017 the Company announced a dividend of 2.0 cents per share which was paid on 30 June 2017.

* 7 for 1 share consolidation was completed on 6 July 2016. Prior year values were restated.

CHAIRMAN'S REPORT

Dear Valued Shareholders

I feel sure, that as you peruse the content of this annual report, you will feel some of the excitement, enthusiasm and pleasure that we as a board have experienced during 2017/2017.

We do not take the hard work of our staff and management for granted. Their skills and diligence in achieving this enhanced profitable result is recognised and appreciated. We also gratefully acknowledge the considerable input of our independent Directors and the years' of experience they bring to the board table.

The growth we anticipated in last year's report has enabled us to reward your loyalty with a further dividend and reduction in our old ledger debts.

We continue to be diligent about the quality of our lending. The ease of obtaining low interest credit in today's market is encouraging many to take on rather large unhealthy levels of debt, it is something we remind ourselves of constantly, and monitor closely.

We will during this year continue to diversify particularly with the Quest Insurance side of our business, where we see potential for strong growth in both volume and profitability.

We have the full support of our Bankers and our major shareholder Federal Pacific Group. Our balance sheet is in a very healthy position.

Therefore, we are looking forward to the challenge of how to utilize those assets in the year ahead to further reward you for your long years of support to both the Board and the company itself.

David Smale
Chairman

MANAGING DIRECTOR'S REPORT

Financial Result (12 months to 31st March 2017)

The after tax financial result for the year was a profit of \$5.1m vs \$3.5m in 2016. This profit increase backed up the March 2016 result, +61% growth in after tax profit with this year's result. The company also distributed a 2.0 cents per share dividend, paid on 30 June 2017, which is up 33% on the group's maiden, special dividend paid out in August 2016.

Business Performance:

The Group reported an after tax profit for the year of \$5.1m (2016: \$3.5m). Each of the Group's trading entities delivered profit for the year.

Geneva Financial Services (GFSL - New Business Lending) Mar 17 pretax profit \$4.5m (Mar 16 \$3.0m)

The main driver of the profit increase was the growth in the receivables ledger, up 21% on last year. This, driven by increased lending volumes, and in conjunction with the maintenance of contractual yields, control of asset quality and operating costs gave this trading entity a good result for the year.

Quest Insurance Group (Quest - Insurance): Mar 17 pretax profit \$0.9m (Mar 16 \$0.5m)

Following an 87% increase in gross written premium (GWP) in March 16, Quest again grew GWP by 14%, to \$3.0m in the March 17 year. The combined profit impact of these two years of growth is reflected in the March 17 profit, up 97% to \$0.9m. This cumulative impact on profit is a consequence of premium income being recognized over the life of the policy, which often flows into the following reporting period. On 31 March 17, Quest finalized an underwriting agreement commencing 1 April 2017 with Janssen's Insurance. This partnership is expected to more than double Quest's GWP in the coming year.

Stellar Collections (Stellar - Old Business Ledgers): Mar 17 pretax profit \$0.2m (Mar 16 \$0.6m)

Stellar's profit reduced by 58% to \$0.2m. The reduction is due to the reducing old ledger asset base. This trading entity continues to pursue opportunities to grow its operations, so as to replace the reducing revenue from the old ledger asset base, in the coming year.

Pacific Rise (Property) Mar 17 pretax profit \$0.0m (Mar 16 \$0.1m)

This operation did not trade during the period.

Parent Company (Geneva Finance, Corporate) Mar 17 pretax loss \$1.8m (Mar 16 \$1.7m loss)

The Group has approximately \$7.0m (tax effected) of tax losses available and has recognized additional \$1.3m of deferred tax this period. Corporate and governance costs continued to be carried by the Parent Company.

Revenues:

Operating revenues comprise interest from receivables ledgers of \$11.4m up \$2.1m (+23%) on last year as a result of the growth in the receivables ledger referred to above. Net insurance premium income of \$2.5m up \$1.1m (+84%) reflects the continued expansion of this entity following Quest's exit from the small insurer regime in the previous year. Other income amounted to \$1.6m (-5%).

Operating Costs:

Group total operating costs increased by 12%. The main driver of this increase being the interest and insurance commissions paid to introducers as a consequence of the growth in both GFSL and Quest's respective sales.

Balance Sheet:

The net receivables ledger increased to \$64.0m (+17%) as a result of the increased lending. Term debt increased to \$46.1m and other borrowings increased to \$8m. The Group's equity to total assets ratio remains conservative, having increased slightly to 29.5% from 29.1% in the prior year.

Funding:

The securitization facility's annual review was completed in August 2016 and the facility was extended through to July 2018.

Other Borrowings comprise funding sourced from eligible professional investors and a 2 year evergreen banking term loan of \$3.4m from a major trading bank.

Strategic Direction:

The group remains committed to building on the progress made to date in its core operations. The conservative balance sheet ensures Geneva is well position for expansion, whether through organic growth or by acquisition. On 31 March 17, the Group completed an underwrite transaction that will more than double the insurance gross written premium in the coming year. Other opportunities exist and the board and management will continue to explore these.

Yours sincerely,

David O'Connell

Managing Director

BOARD PROFILES

David Smale (Non-executive Chairman)

David is a successful business man with 40 years experience in the establishment, and building of a number of businesses in the primary, horticultural and export sectors. As a result of Geneva's capital reconstruction, David has a shareholding in Geneva, accordingly he has a strong affinity with the position of all shareholders and is committed to see Geneva through the current challenges. David brings hands on, common sense, no nonsense approach to business management. David also serves on Geneva's Audit, Lending and Credit and Executive Remuneration Committees. David does not hold any other public company directorships.

David Gerard O'Connell (Managing Director)

David joined Geneva as the Chief Financial Officer in July 2006. He was appointed as Managing Director on 2 May 2008. He is a member of the NZ Institute of Chartered Accountants and has been an executive director of Geneva since June 2007. Over the last 20 years David has held senior management roles and directorships in major New Zealand companies and has been involved in a number of successful company turnaround situations. David holds a BCA from Victoria University, Wellington. David does not hold any other public company directorships.

Ronald Robin King (Robin)

Robin was the founder and director of the successful building services firm Robin King & Associates, which operated for more than 20 years and remained company accountant after selling out in 1997. He has extensive experience in investment and management, and has held directorships with a number of companies in both New Zealand and Australia. As a result of the capital reconstruction, Robin has a shareholding in Geneva, accordingly, he has a strong affinity with the position of all shareholders and is committed to see Geneva through the current challenges. Robin is chairman of the Audit Committee and also serves on the Executive Remuneration Committee. Robin does not hold any other public company directorships.

Alan Leighton Maiai Hutchison

Alan is the board representative of FedPac. Alan has acted as a company director since 1994 and currently holds directorships in New Zealand and a number of overseas companies including Ireland, Singapore, Australia, and Samoa. Alan holds a Bachelor of Commerce and a LLB from Auckland University and has been admitted as a barrister and solicitor to both the high court of New Zealand and Supreme Court of Samoa.

GOVERNANCE

The Board of Directors

The Board's primary responsibility is to formulate the strategic direction of the company, oversee the financial and operational controls of the business and manage appropriate risk management strategies and policies. The Board is also responsible for fostering the business culture, appointment and remuneration of senior executives, adoption of plans and policies, the approval of major transactions and review of the business risks.

Ethical Conduct

The Board is committed to behaving in an ethical manner at all times. This includes, but is not limited to: Disclosure of conflicts of interest, Disclosure of receipts of any gifts and/or entertainment, behaving fairly in all business dealings and employment contracts.

Selection and Role of Chairman

The Chairman is selected by the Board from the non-executive directors. The Chairman's role is to manage the board effectively, provide leadership and facilitate the Board's interaction with the Managing Director.

Board Membership

The Board currently consists of the (Non executive) Chairman David Smale, two Non-executive Directors Alan Hutchison and Robin King and one Executive Director David O'Connell.

Director Independence

Each of the directors has confirmed that they do not have any conflicts of interest in respect of their obligations as a director of Geneva Finance Limited. Should any conflict arise out of a particular transaction, the directors have undertaken that they will disclose such conflict of interest.

Nomination and Appointment of directors

The Board is responsible for identifying and recommending candidates. Directors may also be nominated by shareholders under Listing Rule 3.2.2. A director may be appointed by an ordinary resolution or the Board. A person so appointed as a director shall retire from office at the next annual meeting of the company, but shall be eligible for re-election at that meeting. One third of directors shall retire from office at the annual meeting of the company each year, but shall be eligible for reelection at that meeting. The directors to retire shall be those who have been longest in office since they were last elected or deemed elected.

Directors Meetings

In the normal course of events the directors meet to review the financial results at least once every 2 months, normally during the last week of the month. The exception to this being December and January each year where Board meetings are not normally scheduled. In addition the Board will meet on an ad hoc basis where it is considered necessary to discuss matters that need attention prior to a scheduled meeting.

Indemnification and Insurance of Directors and Officers

The Company has a policy of providing directors and senior officers' liability insurance. These policies are provided by QBE.

BOARD COMMITTEES

Audit Committee:

The role of the audit committee is to assist the board in carrying out its responsibilities under the Companies Act 1993 and the Financial Markets Conduct Act 2013, regarding accounting practices, policies and controls relative to the company's financial position and make appropriate enquiry into the audits of the company's financial statements. This responsibility includes providing the Board with additional assurance about the quality and reliability of the financial information issued publicly by the company. This committee comprises, as chairman Robin King and independent directors.

Remuneration Committee:

The Remuneration Committee comprises the non-executive directors. This committee meets annually to determine and approve the remuneration of the Managing Director and selected key executives.

Lending and Credit Committee

The Lending Committee reviews the lending and credit performance policies of the company. This committee plans to meet formally on a four monthly basis in the coming year. It is intended that this committee be comprised of the chairman and two independent directors.

Audit and Risk Management Committee

The Audit and Risk Management Committee oversees the insurance financial reporting, internal and external audits, the appointment of the approved auditor and approved actuary and assist the board in providing an objective, non-executive review of the effectiveness of the insurer's financial reporting and risk management and control processes. This committee meets twice a year.

Managing risk

The Board has overall responsibility for the company's system of risk management and internal control and has procedures in place, i.e. Risk Management Programme to provide effective control of the management and reporting structure. Part of this function is covered by the Lending and Credit Committee.

The financial statements are prepared with full supporting schedules providing analysis of all risk areas on a monthly basis. As set out above, the Board meets at least once every 2 months (excluding December and January) to formally review these reports and receive appropriate explanations from management.

All capital expenditure is controlled and monitored under a structured framework.

The Board maintains an overall view of the risk profile of the company and is responsible for the overall risk assessment processes.

Securities trading

The company has implemented a Securities Trading Policy for directors and staff. The policy follows the recommendations contained in the guidelines issued by the Listed Companies Association.

Disclosure

The company adheres to the NZAX policy of Continuous Disclosure requirements which govern the release of all material information that may affect the value of the company's shares. The Board and senior management team have processes in place to ensure that all material information flows up to the Managing Director to be viewed by the Board and disclosed where appropriate.

Auditor's independence

There is no relationship between the auditors and the company or any related person that could compromise the independence of the auditors. In addition to the audit, Staples Rodway was paid fees for other services (including taxation compliance services) totaling \$37k

INDEPENDENT AUDITOR'S REPORT

To the Shareholders of Geneva Finance Limited

Report on the Audit of the Consolidated Financial Statements

Opinion

We have audited the consolidated financial statements of Geneva Finance Limited and its subsidiaries ('the Group') on pages 6 to 54, which comprise the consolidated statement of financial position as at 31 March 2017, and the consolidated statement of comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flows for the year then ended, and notes to the consolidated financial statements, including significant accounting policies.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as at 31 March 2017, and its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with New Zealand Equivalents to International Financial Reporting Standards ('NZ IFRS') and International Financial Reporting Standards ('IFRS').

Our report is made solely to the Shareholders of Geneva Finance Limited, in accordance with the Companies Act 1993. Our audit work has been undertaken so that we might state those matters which we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than Geneva Finance Limited and the Shareholders of Geneva Finance Limited, for our audit work, for our report or for the opinions we have formed.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (New Zealand) ('ISAs (NZ)'). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Consolidated Financial Statements* section of our report. We are independent of the Group in accordance with Professional and Ethical Standard 1 (Revised) *Code of Ethics for Assurance Practitioners* issued by the New Zealand Auditing and Assurance Standards Board and the International Ethics Standards Board for Accountants' *Code of Ethics for Professional Accountants* ('IESBA Code'), and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other than in our capacity as auditor and provider of other assurance services, our firm carries out other assignments for Geneva Finance Limited and its subsidiaries in the area of taxation compliance services. The provision of these other services has not impaired our independence.

Key Audit Matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the consolidated financial statements of the current year. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. Key audit matters are selected from the matters communicated with the Directors, but are not intended to represent all matters that were discussed with them.

Key Audit Matter

How our audit addressed the key audit matter

Valuation of Finance Receivables

As disclosed in Note 16 of the Group's consolidated financial statements the Group has finance receivable assets of \$64.1m. Finance receivable assets were significant to our audit due to the size of the assets and the subjectivity, complexity and uncertainty inherent in the timing of the recognition of impairment in respect of finance receivables and the amount of that impairment.

The assessment of impairment is made at both an individual finance receivable level, for individually significant receivables, and a collective level for groups of finance receivables with similar credit risk characteristics.

Management has prepared impairment models to complete its assessment of impairment for the Group's finance receivables as at 31 March 2017.

This assessment involves complex and subjective estimation and judgement by Management on credit risk and the future cash flows of the finance receivables.

Our audit procedures among others included:

- Evaluating the design and operating effectiveness of the key controls over finance receivable origination, ongoing administration and impairment model data and calculations;
- For individually assessed finance receivables, examining those finance receivables and forming our own judgements as to whether the impairment provision recognised by Management was appropriate;
- For the collectively assessed finance receivables, challenging and evaluating the logic of Management's impairment models and the key assumptions used with our own experience. Also, testing key inputs used in the collective impairment models and the mathematical accuracy of the calculations within the models;
- Challenging key inputs used by Management in the collective impairment models by performing sensitivity analyses for reasonably possible changes in these inputs; and
- Evaluating the related disclosures about finance receivables, and the risks attached to them which are included in Notes 16, 17, 18 and 35 in the Group's consolidated financial statements.

Valuation of Insurance Contract Liabilities

As disclosed in Notes 27 and 28 of the Group's consolidated financial statements the Group has total insurance contract liabilities of \$3.1m (outstanding claims liabilities of \$0.3m as disclosed in note 27 and unearned premium liabilities of \$2.8m disclosed in note 28). The Group's insurance contract liabilities were significant to our audit due to the size of the liabilities and the subjectivity, complexity and uncertainty inherent in estimating the impact of claims events that have occurred but for which the eventual outcome remains uncertain.

Management has engaged an external actuarial expert to estimate the Group's insurance contract liabilities as at 31 March 2017.

Our audit procedures among others included:

- Evaluating the design and operating effectiveness of the key controls over insurance contract origination, ongoing administration, integrity of data provided to Management's external actuarial expert used in the estimation process and management's review of the estimates;
- Evaluating the competence, capabilities, objectivity and expertise of Management's external actuarial expert and the appropriateness of the expert's work as audit evidence for the relevant assertions;
- Agreeing the data provided to Management's external actuarial expert to the Group's records;
- Engaging our own actuarial expert to assist in understanding and evaluating:
 - the work and findings of the Group's external actuarial expert engaged by Management;
 - the Group's actuarial methods and assumptions to assist us in challenging the appropriateness of actuarial methods and assumptions used by Management;
- Assessing the selection of methods and assumptions with a view to identifying management bias;
- Evaluating the related disclosures about insurance contract liabilities, and the risks attached to them which are included in Notes 5, 27 and 28 in the Group's consolidated financial statements.

Other Information

The Directors are responsible for the other information. The other information comprises the information included in the Group's annual report for the year ended 31 March 2017 (but does not include the consolidated financial statements and our auditor's report thereon).

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of audit opinion or assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Responsibilities of the Directors for the Consolidated Financial Statements

The Directors are responsible on behalf of the Group for the preparation and fair presentation of the consolidated financial statements in accordance with NZ IFRS and IFRS, and for such internal control as the Directors determine is necessary to enable the preparation of the consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, the Directors are responsible on behalf of the Group for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Group or to cease operations, or have no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (NZ) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with ISAs (NZ), we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of the use of the going concern basis of accounting by the Directors and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with the Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with the Directors, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current year and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Matters Relating to the Electronic Presentation of the Audited Consolidated Financial Statements

This audit report relates to the consolidated financial statements of Geneva Finance Limited and its subsidiaries for the year ended 31 March 2017 included on Geneva Finance Limited's website. The Directors of Geneva Finance Limited are responsible for the maintenance and integrity of Geneva Finance Limited's website. We have not been engaged to report on the integrity of Geneva Finance Limited's website. We accept no responsibility for any changes that may have occurred to the consolidated financial statements since they were initially presented on the website.

The audit report refers only to the consolidated financial statements named above. It does not provide an opinion on any other information which may have been hyper linked to or from these consolidated financial statements. If readers of this report are concerned with the inherent risks arising from electronic data communication they should refer to the published hard copy of the audited consolidated financial statements and related audit report dated 12 July 2017 to confirm the information included in the audited consolidated financial statements presented on this website.

Legislation in New Zealand governing the preparation and dissemination of consolidated financial statements may differ from legislation in other jurisdictions.

The engagement partner on the audit resulting in this independent auditor's report is G K Raniga.

CONSOLIDATED STATEMENT OF CASH FLOWS

FOR THE YEAR ENDED 31 MARCH 2017

	Note	2017 \$000's	2016 \$000's
Cash flow from operating activities:			
Cash was provided from:			
Interest received		10,220	8,525
Dividends received		163	170
Receipts from insurance policy sales, collections activities and other sources		4,140	3,847
Proceeds from collections made on purchased debt ledger		434	423
		14,957	12,965
Cash was applied to:			
Net movement in finance receivables		(8,652)	(11,918)
Interest paid		(3,456)	(3,372)
Payments to suppliers and employees		(7,120)	(7,022)
		(19,228)	(22,312)
Net cash outflow from operating activities	(37)	(4,271)	(9,347)
Cash flows from investing activities:			
Cash was provided from:			
Proceeds from the sale of fixed assets		-	12
		-	12
Cash was applied to:			
Purchase of plant and equipment		(66)	(38)
Purchase of intangible assets		(359)	(153)
Purchase of third-party debt ledger		-	(143)
		(425)	(334)
Net cash outflow from investing activities		(425)	(322)
Cash flows from financing activities:			
Cash was provided from:			
Net movement of term facilities: Westpac		5,700	10,170
Net movement of term facilities: Kiwi Bank		-	3,400
Net movement of other borrowings		3,100	-
Issue of new shares		-	380
		8,800	13,950
Cash was applied to:			
Net movement of other borrowings		(1,057)	(348)
Payments relating to the issue of new shares		-	(2)
		(1,057)	(350)
Net cash inflow from financing activities		7,743	13,600
Net increase in cash and cash equivalents held		3,047	3,931
Add: Opening cash and cash equivalents balance at the beginning of the year		8,025	4,094
Cash and cash equivalents at the end of the year	(14)	11,072	8,025
Represented by:			
Cash at bank		11,072	8,025
Cash and cash equivalents at the end of the year	(14)	11,072	8,025

The attached notes form part of and are to be read in conjunction with these financial statements.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 MARCH 2017

1. Reporting entity

Geneva Finance Limited (the 'Company') is incorporated and domiciled in New Zealand. Geneva Finance Limited is registered under the Companies Act 1993 and is listed on the New Zealand Alternative Stock Exchange ('NZAX').

The Company's name was changed from GFNZ Group Limited to Geneva Finance Limited on 27 June 2016.

Geneva Finance Limited is a FMC reporting entity for the purposes of the Financial Markets Conduct Act 2013.

The consolidated financial statements of Geneva Finance Limited and its subsidiaries (together "the Group") have been prepared in accordance with the Companies Act 1993 and the Financial Market Conduct Act 2013.

The Company's subsidiaries are listed in note 21.

The Group is a for-profit entity.

The Group's primary activities are to lend money to individuals, companies and other entities, issue temporary insurance contracts covering death, disablement and redundancy risk and short term motor vehicle insurance contracts covering comprehensive, third party, mechanical breakdown and guaranteed asset protection and provide debt collection services.

The financial statements were authorised for issue by the directors on 12 July 2017

2. Basis of preparation

a) Statement of compliance

The company's reporting date is 31 March. These financial statements have been prepared for the year ended 31 March 2017. The comparative period is for the year ended 31 March 2016. The financial statements ('financial statements') have been prepared in accordance with New Zealand Generally Accepted Accounting Practice ("NZ GAAP"). They comply with New Zealand equivalents to International Financial Reporting Standards ("NZ IFRS"), and other applicable Financial Reporting Standards, as appropriate for-profit entities. The financial statements also comply with International Financial Reporting Standards ("IFRS").

b) Basis of measurement

These financial statements have been prepared under the historical cost convention, as modified by the revaluation of certain assets and liabilities as identified in specific accounting policies detailed in note 3.

c) Functional and presentation currency

The functional currency of each entity within the Group is New Zealand Dollars (\$). The presentation currency of and Group is New Zealand Dollars (\$) and all amounts are rounded to the nearest thousand dollars (\$000) unless otherwise stated.

3. Significant accounting policies

The accounting policies set out below have been applied consistently to all periods presented in these financial statements, and have been applied consistently by Group entities.

a) New and amended standards and interpretations

Adoption of new and amended accounting standards that are mandatory for first time adoption.

The following new standards, amendments and interpretations to existing standards mandatory for the first time for the financial period ended 31 March 2017:

- There are a number of other new and amended standards, and interpretations mandatory for first time adoption for the financial year ended 31 March 2017 but not currently relevant to the Group in preparing these financial statements. These other new and amended standards and interpretations are not expected to have an impact on the Group's financial statements.

The following new standards, amendments and interpretations are issued but not yet effective for the Group's accounting periods beginning on or after 1 April 2017 or later periods. The Group has not early adopted them.

3. Significant accounting policies (continued)

a) New and amended standards and interpretations (continued)

- NZ IFRS 9 Financial Instruments (effective date: periods beginning on or after 1 January 2018)

NZ IFRS 9, 'Financial instruments', addresses the classification, measurement and recognition of financial assets and financial liabilities. It replaces the guidance in NZ IAS 39, 'Financial Instruments: Recognition and Measurement', that relates to the classification and measurement of financial instruments. NZ IFRS 9 retains but simplifies the mixed measurement model and establishes three primary measurement categories for financial assets: amortised cost, fair value through other comprehensive income ('OCI') and fair value through profit and loss. The basis of classification depends on the entity's business model and the contractual cash flow characteristics of the financial asset. Investments in equity instruments are required to be measured at fair value through profit or loss with the irrevocable option at inception to present changes in fair value in OCI not recycling.

There is now a new expected credit losses model that replaces the incurred loss impairment model used in NZ IAS 39. For financial liabilities, there were no changes to classification and measurement except for the recognition of changes in own credit risk in other comprehensive income, for liabilities designated at fair value through profit or loss.

NZ IFRS 9 also relaxes the requirements for hedge effectiveness by replacing the bright line hedge effectiveness tests. It requires an economic relationship between the hedged item and hedging instrument and for the 'hedged ratio' to be the same as the one management actually use for risk management purposes. Contemporaneous documentation is still required but is different to that currently prepared under NZ IAS 39

The standard is effective for accounting periods beginning on or after 1 January 2018. Early adoption is permitted. The Group intends to adopt NZ IFRS 9 on its effective date and there is a project plan in place to assess the full impact of the standard. Preliminary assessment indicates that implementation of the standard will impact the Group's financial statements as follows:

- Classification and measurement of financial instruments: The Group's financial assets and liabilities primarily include only those measured at amortised cost and fair value through profit and loss. The Group anticipates that the classification and measurement of these financial assets and liabilities will be largely unchanged under NZ IFRS 9. The Group's available for sale financial assets will however need to be reclassified as financial assets at fair value through OCI or fair value through profit and loss;
- Impairment model change from incurred losses to expected credit losses: The Group's incurred credit losses from the finance receivables have historically been significant even with the Group's strong credit risk management processes that are in place. The introduction of the expected losses model is expected to have a material impact on the Group's financial statements, given the Group's exposure to counterparty default risk and the nature of consumer finance lending.
- Hedge accounting: The adoption of NZ IFRS 9 is not expected to have a material impact on the Group's existing hedging arrangement but could provide scope to apply hedging accounting to a broader range of transactions in the future. The Group is also currently assessing whether to take the accounting policy choice, permitted under the IFRS 9 transition to contract to account for all hedges under NZ IAS 39.

- NZ IFRS 15 Revenue from Contracts with Customers (effective date: periods beginning on or after 1 January 2018)

NZ IFRS 15 deals with revenue recognition and establishes principles for reporting useful information to users of financials statements about the nature, amount, timing and uncertainty of revenue and cash flow arising from an entity's contracts with customers. Revenue is recognised when a customer obtains control of a good or service and thus has the ability to direct the use and obtain the benefits from the good or service. The standard replaces NZ IAS 18 'Revenue' and NZ IAS 11 'Construction contracts' and related interpretations.

NZ IFRS 15 'Revenue from Contracts with Customers' provides a five-step model to be applied to the recognition of revenue arising from contracts with customers:

- identify the contract with the customer;
- identify the performance obligations in the contract;
- determine the transaction price;
- allocate the transaction price to the performance obligations in the contract; and
- recognise revenue when (or as) the entity satisfies a performance obligation.

3. Significant accounting policies (continued)

a) New and amended standards and interpretations (continued)

NZ IFRS 15 also introduces new disclosures about revenue.

The standard is effective for annual periods beginning on or after 1 January 2018 and earlier application is permitted. The Group intends to adopt NZ IFRS 15 on its effective date and there is a project plan place to assess the full impact of the standard.

Preliminary assessment indicates that implementation of the standard will impact the Group's financial statements as follows:

- Finance receivable related income: The adoption of NZ IFRS 15 is not expected to impact the Group's interest income earned by its finance business from finance receivables as they currently fall within the scope of NZ IAS 39 (and in future NZ IFRS 9, refer above) which is specifically scoped out of NZ IFRS 15. Fees and other income recognised by the Group in connection with the finance receivables are currently recognised as the Group satisfies its performance obligation to its customers, being the periodic fees earned for activities undertaken by the Group.

- Insurance contract related income: The adoption of NZ IFRS 15 is not expected to impact the Group's premium income earned by its insurance business from the insurance contracts it issues as they currently fall within the scope of NZ IFRS 4 Insurance Contracts (and in future NZ IFRS 17, refer below) which is specifically scoped out of NZ IFRS 15.

- The investment income earned by the Group's currently fall within the scope of NZ IAS 39 (and in future NZ IFRS 9, refer above).

- Commission, brokerage and collection service income: The adoption of NZ IFRS 15 is expected to involve a change to the timing in which revenue is recognised from the provision of its brokerage and collection services and also refinements to the Group's business systems and processes associated with these services. The Group has not made an assessment if the adoption of NZ IFRS 15 will have a significant impact on the Group financial statements.

- The Group's not entered into any other material contracts with customers.

- NZ IFRS 16 Leases (effective date: periods beginning on or after 1 January 2019)

NZ IFRS 16 Leases will replace NZ IAS 17 Leases and associated pronouncements. The new standard provides a single lessee accounting model for the recognition, measurement, presentation and disclosure of leases. NZ IFRS 16 applies to all leases including subleases and requires lessees to recognise assets and liabilities for all leases, unless the lease term is 12 months or less, or the underlying asset has a low value. Lessors continue to classify leases as operating or finance.

NZ IFRS 16 requires a lessee to recognise a lease liability reflecting future lease payments and a 'right-of-use asset' for virtually all lease contracts. NZ IFRS 16 distinguishes between leases and services rendered on the basis of whether there is an identified asset controlled by the customer.

The effective date is annual reporting periods beginning on or after 1 January 2019. Earlier application is permitted, if NZ IFRS 15 Revenue from Contracts with Customers has also been adopted.

Preliminary assessment in the adoption of NZ IFRS 16 indicates recognition of lease liabilities for all leases the Group is a party to (with the exception of certain short-term leases and leases of low value assets). Subsequent to initial measurement, the Group will accrete the lease liability based on the interest method, using a discount rate determined at lease commencement and reduce the lease liability by lease payments made.

The Group intends to adopt NZ IFRS 16 no later than the financial year beginning 1 April 2019. The impact of NZ IFRS 16 has not yet been quantified and will be dependent on the leases that the Company is a party to at the beginning of the comparative accounting period presented in the Company's financial statements for the year beginning 1 April 2018.

3. Significant accounting policies (continued)

a) New and amended standards and interpretations (continued)

NZ IFRS 17 Insurance Contracts (effective date: periods beginning on or after 1 January 2021)

NZ IFRS 17 Insurance Contracts will replace NZ IFRS 4 Insurance Contracts on accounting for insurance contracts and is effective for annual financial reporting periods beginning 1 January 2021.

Under the NZ IFRS 17, insurance contract liabilities will be calculated at the present value of future insurance cash flows with a provision for risk. The discount rate applied will reflect current interest rates. If the present value of future cash flows would produce a gain at the time an insurance contract is issued, the model would also require a "contractual service margin" to offset the day 1 gain. The contractual service margin would be amortized over the life of the insurance contract. There would also be a new income statement presentation for insurance contracts, including a revised definition of revenue and additional disclosure requirements.

NZ IFRS 17 will also have accommodations for certain specific types of insurance contracts. Short-duration insurance contracts will be permitted to use a simplified unearned premium liability model until a claim is incurred. For some contracts, in which the cash flows are linked to underlying items, the liability value will reflect that linkage.

The Group is yet to assess the impact of NZ IFRS 17. The Group intends to adopt NZ IFRS 17 no later than the financial year beginning 1 April 2021.

b) Basis of consolidation

These financial statements consolidate the financial statements of Geneva Finance Limited and its subsidiaries (together "the Group"). The Company and each its subsidiaries have the same financial reporting period end, being 31 March.

Subsidiaries

Subsidiaries are all entities (including structured entities) over which the Group has control. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are deconsolidated from the date that control ceases. The Company carries investments in subsidiaries at cost less impairment.

Where subsidiaries have been sold or acquired during the period, their operating results have been included to the date control ceases or from the date control is transferred to the Group.

The acquisition method of accounting is used to account for business combinations. The cost of acquisition is measured as the fair value of the assets given, equity instruments issued and liabilities incurred or assumed at the date of exchange. Costs directly attributable to the acquisition are expensed. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at acquisition date. The excess of the consideration transferred, the amount of any non-controlling interest in the acquiree and the acquisition-date fair value of any previous equity interest in the acquiree over the fair value of the Group's share of the identifiable net assets acquired is recorded as goodwill. If there is a deficit (i.e. a bargain purchase), the deficit is recognised directly in profit or loss.

Inter-company transactions, balances and unrealised gains on transactions between Group companies are eliminated on consolidation. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. The accounting policies of the subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

c) Revenue and expenses recognition

Revenue is recognised to the extent that it is probable that economic benefits will flow to the Group and that revenue can be measured reliably. Expenses are recognised as incurred in profit and loss on an accrual basis. Specific revenue and expense recognition policies have been outlined in accounting policies 'd' to 'l'.

3. Significant accounting policies (continued)

d) Interest income and interest expense

Interest income, interest expense and borrowing costs are recognised in profit or loss as they accrue, using the effective interest method.

The effective interest method calculates the amortised cost of a financial asset or financial liability and allocates the interest income or interest expense, including any fees and directly related transaction costs that are an integral part of the effective interest rate, over the expected life of the financial asset or liability. The application of the method has the effect of recognising income and expense on the financial asset or liability evenly in proportion to the amount outstanding over the period to maturity or repayment.

e) Premium revenue

Premium revenue comprises amounts charged to the insurance contract policyholders, excluding taxes collected on behalf of third parties. The earned portion of premiums received and receivable is recognised as revenue. Premium earned is earned from the date of attachment of risk over the indemnity period. Earned and unearned premiums are determined by apportioning the premium income written over the indemnity period from date of attachment.

f) Finance receivable origination and insurance contract acquisition costs

Direct and incremental costs related to the origination of finance receivables, are initially recognised as part of the cost of acquiring the asset and written off as an adjustment to its expected yield over its expected life using the effective interest method. The write off is to interest income as part of the effective interest rate.

Direct expenses incurred in obtaining insurance contracts are amortised over the life of the contract in proportion to services rendered, in accordance with the Margin of Services reporting principle. Deferred insurance contract acquisition costs are subject to a loss recognition test as to their recoverability.

g) Fee and commission income

Fees and commission income integral to the effective yield of a financial asset or liability are recognised as an adjustment to the effective interest calculation and included in interest income.

Fees and commissions that relate to the execution of a significant act (for example, loan servicing fees and insurance commissions) are recognised when the significant act has been completed.

h) Outward reinsurance

Premium ceded to reinsurers is recognised as an expense in accordance with pattern of reinsurance services received. A portion of outwards reinsurance premium is treated as a prepayment.

i) Claims expense

Claims expense represents payment for insurance claims and the movement in outstanding claims liabilities.

The central estimate of outstanding claims liabilities is the best estimate of the present value of future projected claims payments and associated claims handling costs in respect of claims reported but not yet paid, claims incurred but not reported (IBNR) .

Claims outstanding are assessed by review of individual claim files and estimated changes in the ultimate cost of settling claims. The policyholder liability is provided for on the basis of the total loss forecast including a prudential margin. As the Group's insurance business is short term, the impact of discounting to present value is not considered material, and the liability for claims is measured as the amounts of expected future payments. Claims outstanding have been subjected to an actuarial review which has formed the basis of valuation of the net liability in the statement of financial position (refer to policy 'X').

j) Offsetting of income and expenses

Income and expenses are not offset unless required or permitted by accounting standards. This generally arises in circumstances where the Group acts as an agent on behalf of a Customer and only the commission fee revenue is recognised:

- where amounts are collected on behalf of third parties, where the Group is, in substance, acting as an agent only; or
- where costs are incurred on behalf of customers from whom the Group is reimbursed.

3. Significant accounting policies (continued)

k) Income tax expense

Income tax expense comprises current and deferred tax. Current and deferred tax is recognised as an expense or income in profit and loss, except when they relate to items that are recognised outside profit or loss (whether in other comprehensive income or directly in equity), in which case the tax is also recognised outside profit or loss.

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

Deferred tax is recognised using the liability method, providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is not recognised for the following temporary differences: the initial recognition of goodwill, the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit, and differences relating to investments in subsidiaries and jointly controlled entities to the extent that the timing of the reversal is controlled by the Group. Deferred tax is measured at the tax rates that are expected to be applied to the temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date.

A deferred tax asset is recognised to the extent that it is probable that future taxable profits will be available against which temporary differences and unutilised tax losses can be utilised. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

Deferred income tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred income taxes relate to the same fiscal authority.

Additional income taxes that arise from the distribution of dividends are recognised at the same time as the liability to pay the related dividend is recognised.

l) Goods and services tax

The Group provides financial services. Revenues, expenses, assets, receivables and payables are stated with the amount of goods and services tax ("GST") included. The net amount of GST recoverable from, or payable to, the Inland Revenue Department ("IRD") is included as 'accounts payable and accruals' or 'prepayments and sundry debtors' in the statement of financial position.

Cash flows are included in the cash flow statement inclusive of GST. The GST components of cash flows arising from investing and financing activities, which are recoverable from, or payable to, the IRD are classified as operating cash flows.

m) Financial instruments

Basis of recognition and measurement of financial assets and financial liabilities

The Group classifies financial instruments into one of the following categories at initial recognition: financial assets; financial assets at fair value through profit or loss, available for sale financial assets, loans and receivables and held to maturity financial assets; financial liabilities; financial liabilities at fair value through profit or loss and financial liabilities measured at amortised cost.

The classification depends on the purpose for which the financial instruments were entered into. Management determines the classification of its financial instruments at initial recognition and re-evaluates this designation at every reporting date.

Some of these categories require measurement at fair value. Where available, quoted market prices are used as a measure of fair value. Where quoted market prices do not exist, fair values are estimated using present value or other market accepted valuation techniques, using methods and assumptions that are based on market conditions and risks existing as at reporting date.

A financial instrument is recognised if the Group becomes a party to the contractual provisions of the instrument. Financial assets are derecognised if the Group's contractual rights to the cash flows expire or if the Group transfers them without retaining control or substantially all risks and rewards of the asset. Financial liabilities are de-recognised if the Group's obligations specified in the contract are extinguished.

3. Significant accounting policies (continued)**m) Financial instruments (continued)**

In transactions where substantially all the risks and rewards of ownership of a financial asset are neither retained nor transferred, the Group derecognises the transferred asset if control over that asset is relinquished. The rights and obligations retained in the transfer, such as servicing assets and liabilities, are recognised separately as assets and liabilities, as appropriate. If control over the asset is retained, the Group continues to recognise the asset to the extent of its continuing involvement, which is determined by the extent to which it remains exposed to changes in the value of the transferred asset.

Financial assets

Purchases and sales of financial assets are recognised on trade date – the date on which the Group commits to purchase or sell the asset. Financial assets are initially recognised at fair value plus transaction costs for all financial assets not carried at fair value through profit or loss. Financial assets carried at fair value through profit or loss are initially recognised at fair value and transaction costs are expensed in profit or loss. Investments in equity instruments that do not have a quoted market price in an active market and whose fair values cannot be reliably measured are recognised and subsequently carried at cost.

Available for sale financial assets and financial assets at fair value through profit or loss are subsequently carried at fair value. Loans and receivables and held to maturity investments are carried at amortised cost using the effective interest method. Realised and unrealised gains and losses arising from changes in the fair value of the 'financial assets at fair value through profit or loss' category are included in profit or loss in the period in which they arise. Unrealised gains and losses arising from changes in the fair value of securities classified as available for sale are recognised in other comprehensive income, except for foreign exchange movements on monetary assets, which are recognised in profit or loss. When securities classified as available for sale are sold or impaired, the accumulated fair value adjustments are included in profit or loss as gains and losses from investment securities.

The Group assesses at each reporting date whether there is objective evidence that a financial asset or a group of financial assets is impaired. In the case of equity securities classified as available for sale, a significant or prolonged decline in the fair value of the security below its cost is considered in determining whether the securities are impaired.

If any such evidence exists for available for sale financial assets, the cumulative loss – measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that financial asset previously recognised in profit or loss – is removed from equity and recognised in profit or loss. Impairment losses recognised in profit or loss on equity instruments are not reversed through profit or loss.

(i) Financial assets at fair value through profit or loss

This category has two sub categories: financial assets held for trading, and those designated at fair value through profit or loss at inception. A financial asset is classified in this category if acquired principally for the purpose of selling in the short term or if so designated by management. Derivatives are also categorised as held for trading unless they are designated as hedges. Assets in this category are classified as current. The Group's financial assets at fair value through profit or loss comprise; derivatives and purchased debt.

(ii) Available for sale financial assets

Available for sale financial assets are non derivatives, principally equity securities, which are either designated in this category or not classified in any of the other categories. They are included in non-current assets unless management intends to dispose of the investment within 12 months of the reporting date.

The Group's available for sale financial assets comprise; available for sale equity securities.

(iii) Loans and receivables

Loans and receivables are non derivative financial assets with fixed or determinable payments that are not quoted in an active market. They arise when the Group provides money, goods or services directly to a debtor with no intention of selling the receivable. They are included in current assets, except for those with maturities greater than 12 months after reporting date which are classified as non-current assets.

The Group's loans and receivables comprise; cash and cash equivalents, finance receivables, related party loans and advances and other receivables.

3. Significant accounting policies (continued)

m) Financial instruments (continued)

(iv) Held to maturity investments

Held to maturity investments are non-derivative financial assets with fixed or determinable payments and fixed maturities that the Group's management has the positive intention and ability to hold to maturity.

The Group does not have any held to maturity investments.

Financial liabilities

(i) Financial liabilities at fair value through profit or loss

This category has two sub categories: financial liabilities held for trading, and those designated at fair value through profit or loss at inception. A financial liability is classified in this category if borne principally for the purpose of paying in the short term or if so designated by management. Derivatives are also categorised as held for trading unless they are designated as hedges. Liabilities in this category are classified as current liabilities if they are either held for trading or are expected to be settled within 12 months of reporting date.

The Group's financial liabilities at fair value through profit or loss include derivatives.

(ii) Other financial liabilities

This category includes all financial liabilities other than those designated or classified as fair value through profit or loss. Other financial liabilities are recognised initially at fair value, net of transaction costs incurred.

Other financial liabilities are subsequently stated at amortised cost. Any difference between the proceeds (net of transaction costs) and the redemption value is recognised in profit or loss over the period of the other financial liabilities using the effective interest method.

The Group's other financial liabilities comprise trade and other payables; related party balances; term and professional investor facilities and debt securities.

n) Cash and cash equivalents

Cash and cash equivalents include cash on hand, bank current accounts, deposits held at call with banks and other short term highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value. Bank overdrafts are shown in current liabilities on the statement of financial position.

o) Trade and other receivables

Trade receivables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less provision for impairment.

Collectability of trade receivables is reviewed on an on-going basis. Individual debts which are known to be uncollectable are written off. A provision for impairment of trade receivables is established when there is objective evidence that the Group will not be able to collect all amounts due according to the original terms of the receivables. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganisation, and default or delinquency in payments are considered objective evidence of impairment.

The amount of the provision is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the original effective interest rate. The carrying amount of the financial asset is reduced by the impairment loss through the use of an allowance account. Unrecoverable amounts are written off and recognised in profit or loss. Subsequent recoveries of amounts written off are recognised in profit or loss.

If, in a subsequent period, the amount of impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised (such as an improvement in the debtor's credit rating), the previously recognised impairment loss is reversed and the reversal is recognised in profit or loss.

Subsequent recoveries of amounts written off are recognised in profit or loss.

3. Significant accounting policies (continued)

p) Finance receivables

Finance receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market and are classified as loans and receivables and comprise advances, finance leases, and hire purchase contracts. Finance receivables are initially recognised at fair value including transaction costs that are directly attributable to the issue of the advance, lease or contract. They are subsequently measured at amortised cost using the effective interest method, less any impairment loss.

Impaired assets

An impaired asset is an asset for which an impairment loss has been recognised but is not a restructured asset.

Restructured assets

A restructured asset is an impaired asset for which the original terms have been formally changed to grant the counterparty a concession that would not otherwise have been available, due to the counterparty's difficulties in complying with the original terms. The yield on the asset is greater than the Group's average cost of funds and a loss is not otherwise expected to occur.

Past-due assets

A financial asset on which a counterparty has failed to make a payment when contractually due and is not a restructured asset or impaired asset.

Assets acquired through the enforcement of security

The Group does not acquire assets through the enforcement of security. Where repossession of security occurs, the assets remain owned by the borrower and any realisation proceeds are applied immediately to

Impairment of finance receivables

Finance receivables are regularly reviewed for impairment loss. Credit impairment provisions are raised for receivables that are known to be impaired. Finance receivables are impaired and impairment losses incurred if there is objective evidence of impairment as a result of one or more loss events that occurred after the initial recognition of the loan and that loss event (or events) has had a reliably measurable impact on the estimated future cash flows of the individual finance receivable or the collective portfolio of finance receivables.

The criteria that the Group uses to determine that there is objective evidence of an impairment loss includes:

- Delinquency in contractual payments of principal or interest;
- Initiation of bankruptcy proceedings; and
- Deterioration in the value of collateral.

Impairment is assessed initially for assets that are individually significant. Impairment is then collectively assessed for assets that are not individually significant. Where an asset is determined to not be individually impaired, it is included in a group of assets with similar risk characteristics and collectively tested with that group for impairment.

The estimated individual impairment loss is measured as the difference between the asset's carrying amount and the estimated future cash flows discounted to their present value at the original effective interest rate. The process of estimating the amount and timing of cash flows involves considerable management judgment. These judgements are reviewed regularly to reduce any differences between loss estimates and actual loss experience.

For the purpose of a collective evaluation of impairment, financial assets are grouped on the basis of similar credit risk characteristics (i.e. on the basis of the Group's grading process that considers asset type, collateral type, past-due status and other relevant factors). Those characteristics are relevant to the estimation of future cash flows for groups of such assets by being indicative of the debtor's ability to pay all amounts due according to the contractual terms of the assets being evaluated.

Future cash flows in a group of financial assets that are collectively evaluated for impairment are estimated on the basis of the contractual cash flows of the assets in the group and historical loss experience for assets with credit risk characteristics similar to those in the group. Historical loss experience is adjusted on the basis of current observable data to reflect the impact of current conditions that did not affect the period on which the historical loss experience is based and to remove the effects of conditions in the historical period that do not currently exist.

The provision for credit impairment (specific and collective) is deducted from finance receivables in the statement of financial position and the movement in the provision for the reporting period is reflected in the profit or loss as an impaired asset expense.

3. Significant accounting policies (continued)

p) Finance receivables (continued)

When a finance receivable is uncollectible, it is written off against the related provision for finance receivable impairment. Subsequent recoveries of amounts previously written off are taken to the profit or loss.

Where impairment losses recognised in previous periods are subsequently decreased or no longer exist, such impairments are reversed in the profit or loss.

q) Investments

Investments in equity instruments are valued at their fair value. Where investments in equity instruments that do not have a quoted market price in an active market and whose fair values cannot be reliably measured are recognised and subsequently carried at cost.

r) Trade and other payables

Trade payables are obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers.

Trade payables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method. As trade and other payables are usually paid within 30 days, they are carried at face value.

s) Borrowings, term and professional investor facilities.

Borrowings, term and professional investor facilities and debenture deposits are recognised initially at fair value, net of transaction costs incurred. Borrowings, term and professional investor facilities and debenture deposits are subsequently carried at amortised cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognised in profit or loss over the period of the borrowings or deposits using the effective interest method.

Fees paid on the establishment of loan facilities are recognised as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the draw-down occurs. To the extent there is no evidence that it is probable that some or all of the facility will be drawn down, the fee is capitalised as a prepayment for liquidity services and amortised over the period of the facility to which it relates.

t) Derivative financial instruments and hedge accounting

Derivatives are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently remeasured at their fair market value at each reporting period. Fair values are obtained from quoted market prices in active markets, including recent market transactions, and valuation techniques, including discounted cash flow models and options pricing models, as appropriate. All derivatives are carried as assets when fair values is positive and as liabilities when fair value is negative.

The method of recognising the resulting fair value gain or loss depends on whether the derivative is designated as a hedging instrument, and if so, the nature of the item being hedged. The Group designates certain derivatives as either:

- hedges of the fair value of recognised assets or liabilities or firm commitments (fair value hedge);
- hedges of highly probable future cash flows attributable to a recognised asset or liability, or a forecast transaction (cash flow hedge).

Hedge accounting is used for derivatives designated in this way provided certain criteria are met.

The Group documents, at the inception of the transaction, the relationship between hedged items and hedging instruments, as well as its risk management objective and strategy for undertaking various hedge transactions. The Group also documents its assessment, both at hedge inception and on an on-going basis, of whether the derivative that are used in hedging transactions are highly effective in offsetting changes in fair values or cash flows of hedged items.

The fair value of the derivative instrument used for hedging purposes is disclosed in note 29. Movements on the hedge are shown in other comprehensive income. The full fair value of the hedging derivative is classified as a non-current asset or liability when the remaining period to maturity of the hedged item is more than 12 months, and as a current asset or liability when the remaining maturity of the hedged item is less than 12 months.

3. Significant accounting policies (continued)

t) Derivative financial instruments and hedge accounting (continued)

(i) Fair value hedges

The Group has not classified any derivatives in this category.

(ii) Cash flow hedge

The effective portion of changes in fair value of derivatives that are designated and qualify as cash flow hedges are recognised in other comprehensive income. The gain or loss relating to the ineffective portion is recognised immediately through profit or loss.

Amounts accumulated in other comprehensive income are recycled in the income statement in the periods when the hedged item affects profit or loss.

When a hedging instrument expires or is sold, or when a hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss existing in other comprehensive income at that time remains in other comprehensive income and is recognised when the forecast transaction is ultimately recognised in the income statement. When a forecast transaction is no longer expected to occur, the cumulative gain or loss that was reported in other comprehensive income is immediately transferred to the income statement.

The Group has classified all of its currently held derivatives in this category.

(iii) Derivatives that do not qualify for hedge accounting

The Group has not classified any derivatives in this category.

u) Provisions

Provisions are recognised when the Group has a present obligation (legal or constructive) as a result of a past event, the future sacrifice of economic benefits is probable and the amount of the provision can be measured reliably.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at reporting date, taking into account the risks and uncertainties surrounding the obligation. Where a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows.

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, the receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

v) Employee benefits

Wages, salaries, annual leave and sick leave

Liabilities for wages and salaries, including non-monetary benefits, statutory days in lieu, annual leave and sick leave expected to be wholly settled within 12 months of the reporting date are recognised in respect of employees' services up to the reporting date. They are measured at the amounts expected to be paid when the liabilities are settled.

Superannuation plans

The Group pays contributions to superannuation plans, such as Kiwisaver. The Group has no further payment obligations once the contributions have been paid. The contributions are recognised as an employee benefit expense when they are due. Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in the future payments is available.

w) Insurance contracts

An insurance contract is defined as a contract under which one party (the insurer) accepts significant insurance risk from another party (the policyholder) by agreeing to compensate the policyholder if a specified uncertain future event (the insured event) adversely affects the policyholder. Through its subsidiary Quest Insurance Group Limited, the Group issues temporary life insurance contracts covering death, disability, disablement and redundancy and short term motor vehicle contracts covering comprehensive, third party and mechanical breakdown risks.

3. Significant accounting policies (continued)**x) Outstanding claims liability**

The liability for insurance contracts has been determined in accordance with Appendix C of NZ IFRS 4 *Insurance Contracts*, and Professional Standard No 20 of the New Zealand Society of Actuaries.

In terms of these standards, insurance contract liabilities are determined on the "Margin or Services" principle, under which profits emerge evenly over the life of the contract as services are provided.

y) Property, plant and equipment

All property, plant and equipment are initially recognised at cost.

Property (land and buildings) are subsequently carried at revalued amounts less subsequent accumulated depreciation and impairment losses. The valuation is determined by an independent valuer. Land and buildings are revalued with sufficient frequency to ensure that the carrying value of the item does not differ materially from its fair value. Land is not depreciated. Depreciation on buildings, plant and equipment is provided on the straight line method at rates calculated to allocate the cost less estimated residual value over the estimated economic lives of the assets.

Any revaluation surplus arising on the revaluation of land and buildings is transferred directly to the revaluation reserve. A revaluation deficit in excess of the revaluation reserve for land and buildings is recognised through profit or loss in the period it arises. Revaluation surpluses which reverse previous revaluation deficits recognised in the income statement are recognised as revenue through profit or loss in the period it arises.

Plant and equipment are subsequently carried at cost less, where applicable, any accumulated depreciation and impairment losses. All assets are depreciated over their useful lives. Cost includes expenditures that are directly attributable to the acquisition of the asset. The cost of self-constructed assets includes the cost of materials and direct labour and any other costs directly attributable to bringing the asset to a working condition for its intended use. Purchased software that is integral to the functionality of the related equipment is capitalised as part of that equipment.

The depreciation rates used for each class of assets are:

Class of plant and equipment Depreciation rate Depreciation basis Depreciation method

Computer equipment	20%	Straight Line
Furniture and fittings	20%	Straight Line
Office equipment	20%	Straight Line
Leasehold improvements	10%	Straight Line
Motor vehicles	20%	Straight Line

The carrying amount of property, plant and equipment is reviewed annually by the directors to ensure it is not in excess of the recoverable amount from those assets. The recoverable amount, the higher of fair value less cost to sell and value in use, is assessed on the basis of the expected net cash flows which will be received from the assets' employment and subsequent disposal. The expected net cash flows have been discounted to present values in determining recoverable amounts.

When an item of property, plant and equipment is disposed of, any gain or loss is recognised through profit or loss and is calculated on the difference between the sale price and the carrying value of the asset.

z) Intangible assets

Intangible assets comprise costs incurred in acquiring and building software applications and computer systems (referred to as software).

Acquired computer software licences are capitalised on the basis of the costs incurred to acquire and bring to use the specific software. These costs are amortised on a straight line basis over their estimated useful lives of 3 to 5 years. Costs associated with developing or maintaining computer software programs are recognised as an expense as incurred.

Costs incurred in planning or evaluating software proposals, or in maintaining systems after implementation, are not capitalised.

3. Significant accounting policies (continued)

z) Intangible assets (continued)

At each reporting date, the software assets are reviewed for impairment against impairment indicators. If any indication of impairment exists, the recoverable amount of the assets are estimated and compared against the existing carrying value. Where the existing carrying value exceeds the recoverable amount, the difference is charged to the profit and loss.

aa) Impairment of non-financial assets

Intangible assets that have an indefinite useful life are not subject to amortisation and are tested for impairment annually, or more frequently if events or changes in circumstances indicate that they might be impaired. Intangible assets not yet available for use are tested for impairment annually, or more frequently if events or changes in circumstances indicate that they might be impaired.

Other assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. The Group conducts an annual internal review of asset values, which is used as a source of information to assess for any indicators of impairment. External factors, such as changes in expected future processes, technology and economic conditions, are also monitored to assess for indicators of impairment. If any indication of impairment exists, an estimate of the asset's recoverable amount is calculated.

An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. Value in use is determined by estimating future cash flows from the use and ultimate disposal of the asset and discounting these to their present value using a pre-tax discount rate that reflects current market rates and the risks specific to the asset. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units). Impairment losses directly reduce the carrying amount of assets and are recognised in the income statement.

Non-financial assets other than goodwill that suffer an impairment are reviewed for possible reversal of the impairment at each reporting date.

ab) Leased assets

Leases are classified at their inception as either operating or finance leases based on the economic substance of the agreement so as to reflect the risks and benefits incidental to ownership. Leases in which a significant portion of the risks and rewards of ownership are retained by another party, being the lessor, are classified as operating leases.

Operating leases

(i) Operating leases where the Group is the lessee

Leases in which a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments made under operating leases (net of any incentives received from the lessor) are charged through profit or loss on a straight-line basis over the period of the lease.

(ii) Operating leases where the Group is the lessor

Leases in which a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments received under operating leases (net of any incentives received from the lessor) are charged to the income statement on a straight line basis over the period of the lease.

ac) Share capital

Share capital is classified as equity when there is no obligation to transfer cash or other assets. Incremental costs directly attributable to the issue of new shares are shown in equity as a deduction, net of tax, from the proceeds.

Costs which are not directly attributable to the issue of new shares are shown as an expense and included in administrative expenses in the statement of comprehensive income.

3. Significant accounting policies (continued)

ad) Distributions

Dividends to the Group's shareholders are recognised as a liability in the Group's financial statements in the period in which the dividends are approved but not distributed at reporting date.

ae) Fair value estimates

Financial instruments classified as fair value through profit or loss or available for sale are presented in the Group's statement of financial position at their fair value. For other financial assets and financial liabilities, fair value is estimated as follows:

Cash and cash equivalents

These assets are short term in nature and the carrying value is equivalent to their fair value.

Trade and other receivables

These assets are short term in nature and are reviewed for impairment; the carrying value approximates their fair value.

Finance receivables

Finance receivables have fixed interest rates. Fair value is estimated using a discounted cash flow model based on a current market interest rate for similar products after making allowances for impairment; the carrying value approximates their fair value.

Other borrowings

These liabilities are long term in nature and the carrying value approximates their fair value.

Other payables

These liabilities are short term in nature and the carrying value approximates their fair value.

Borrowings, term and professional investor facilities and debt securities

Borrowings, term and professional investor facilities and debt securities have fixed interest rates. Fair value is estimated using a discounted cash flow model based on a current market interest rate for similar products; the carrying value approximates their fair value.

af) Non current assets held for sale

Non current assets (and disposal groups) classified as held for sale are measured at the lower of their previous carrying amount and fair value less costs to sell.

Non current assets and disposal groups are classified as held for sale if their carrying amount will be recovered through a sale transaction rather than through continuing use. This condition is regarded as met only when the sale is highly probable, the assets (or disposal group) is available for immediate sale in its present condition, and the sale of the asset (or disposal group) is expected to be completed within one year from the date of classification.

ag) Segment reporting

The Group's operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker is the person or group that allocates resources to and assesses the performance of the operating segments on an entity. The Group has determined the Group's Board of Directors as its chief operating decision-maker as the Board is responsible for allocating resources and assessing the performance of the operating segments and making strategic and operating decisions.

Income and expenses directly associated with each segment are included in determining each segment's performance.

The Group's reportable operating segments are the following: corporate, new business consumer finance, insurance, old business consumer finance (including debt collections) and property. Refer note 40 for further details on the Group's operating segments.

The Group operates in primarily in one geographic area, New Zealand.

3. Significant accounting policies (continued)

ah) Statement of cash flows

The statement of cash flows has been prepared using the direct approach. Cash flows from finance receivables, debentures, term facilities and professional investor facilities have been netted to provide meaningful disclosure as many of the cash flows are on behalf of the Group's customers or providers of funding and do not reflect the activities of the Group.

Investing activities

Investing activities are those activities relating to the acquisition of property, plant and equipment and computer software and investments in related party receivables.

Financing activities

Financing activities are those activities relating to changes in the size and composition of the capital structure of the Group and the payment of dividends (if any).

Operating activities

Operating activities include all transactions and other events that are not investing or financing activities. Cash flows arising from movements in finance receivables are classified as operating activities. Operating activities are the main trading activities of the Group.

ai) Changes in accounting policies

Except as outlined in Note 3 (a), all policies have been applied on a basis consistent with those used in the previous reporting period.

4. Critical estimates and judgements used in applying accounting policies

These financial statements are prepared in accordance with NZ IFRS and applicable financial reporting standards. Notwithstanding the existence of relevant accounting standards, there are a number of critical accounting treatments which include complex or subjective judgements and estimates that may affect the reported amounts of assets and liabilities in the financial statements. Estimates and judgements are continually reviewed and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

An explanation of the judgements and estimates made by the Group in the process of applying its accounting policies, that have the most significant effect on the amounts recognised in the financial statements are set out below:

Credit provisioning

Provisions for impairment in customer loans and advances are raised by management to cover actual losses arising from past events. Losses for impaired loans are recognised promptly when there is objective evidence that impairment of a loan or portfolio of loans has occurred. Impairment losses are calculated on individual loans and on loans assessed collectively. Losses expected from future events, no matter how likely, are not recognised. The amount of the impairment loss is recognised as an expense through profit or loss.

The calculation of impairment provisions includes consideration of all expected cash flows associated with the loan. This includes any expected cash flows from realisation of security and interest and takes into account security realisation costs.

Individual provisions

An individual provision is raised where there is an expectation of a loss of principal, interest and/or fees and there is objective evidence of impairment.

At each reporting date, the Group reviews individually significant loans for evidence of impairment. All relevant information, including the economic situation, solvency of the customer/ guarantor, enforceability of guarantees, current security values are taken into account and discounted at the loans original effective interest rate in determining individual provisions. At a minimum, individual provisions are reassessed semi annually, upon receipt of a significant asset realisation or when there is a change in customer circumstances/business strategy.

Collective provisions

A collective provision is calculated for:

- Loans which are not individually impaired, are subject to individual assessment to cover losses which have been incurred but not yet identified; and
- For loans that share similar credit risk characteristics portfolios of loans that are not considered individually significant (e.g. less than \$65,000).

4. Critical estimates and judgements used in applying accounting policies (continued)

The collective provision is estimated on the basis of historical loss experience for assets with credit risk characteristics similar to those in the collective pool. The historical loss experience is then adjusted for the impact of current observable data.

For individually significant loans, historical loss experience used to calculate the individual provision is determined by taking into account historical information on probability of default. The collective provision on homogeneous or portfolio managed receivables is calculated by applying an expected loss factor to the outstanding balances in each loan portfolio. The expected loss factor is determined from internal historical loss data.

The long-term historical loss experience is reviewed by management and adjustments made to reflect current economic and credit conditions as well as taking into account such factors as concentration risk in an individual portfolio. In addition, management recognise that a certain level of imprecision exists in any model used to generate risk grading and provisioning levels. As such an adjustment is applied for model risk.

Management regularly reviews and adjusts the estimates and methodologies as improved analysis becomes available. Changes in these assumptions and methodologies could have a direct impact on the level of credit provision and credit impairment charge recorded in the financial statements (refer Note 17. Provision for credit impairment).

Suspended income

To the extent that it is not probable that economic benefits will flow to the Group from revenue, the revenue is not recognised in the income statement but transferred to a suspended income account in the statement of financial position and offset against gross receivables (refer Note 16. Finance receivables and Note 17. Provision for credit impairment).

Fair value of purchased debt securities

The fair value of financial instruments that are not quoted in active markets are determined by using discounted cash flow models. To the extent practical, models use observable data, however volatilities require management to make estimates. Changes in assumptions about these factors could affect reported fair value of financial instruments (Note 23. Fair value disclosures).

Fair value of available for sale equity securities

The fair value of equity securities not quoted in an active market are determined by using other recognised valuation techniques. To the extent practical, models use observable data, however volatilities require management to make estimates. The fair value of equity securities where the majority of the entity's assets and liabilities are reported in their financial statements at fair value are determined based on the Group share on the entity's net assets (refer Note 15. Equity securities - available for sale).

Deferred tax asset

The Group has recognised a deferred tax asset on its statement of financial position as at reporting date. Significant judgement is required in determining if the utilisation of deferred tax assets is probable. The recognition of deferred tax assets is based upon whether it is more likely than not that sufficient and suitable taxable profits will be available in the future against which the reversal of temporary differences can be deducted. To determine the future taxable profits, reference is made to the latest forecasts of future earnings of the Group. Where the temporary differences are related to losses, relevant tax law is considered to determine the availability of the losses to offset against the future taxable profits (refer Note 13. Tax reconciliation and Note 24. Taxation).

The ultimate liability arising from claims made under insurance contracts

The estimation of the ultimate liability arising from claims made under insurance contracts is based on a variety of actuarial techniques that analyse experience, trends and other relevant factors. The estimate process involved using Group specific data, relevant industry data and general economic data, including but not limited to, claim frequencies, average claim sizes and historical trends (refer Note 5. Actuarial assumptions and methods).

The derecognition of finance receivables

The Group follows the guidance in NZ IAS 39, 'Financial Instruments: Recognition and Measurement', in transactions where substantially all the risks and rewards of ownership of a financial asset are neither retained nor transferred, the Group derecognises the transferred asset if control over that asset is relinquished. The rights and obligations retained in the transfer, such as servicing assets and liabilities, are recognised separately as assets and liabilities, as appropriate. If control over the asset is retained, the Group continues to recognise the asset to the extent of its continuing involvement, which is determined by the extent to which it remains exposed to changes in the value of the transferred asset. This determination of whether risks and rewards of ownership of a financial asset are neither retained nor transferred requires significant judgement. (refer Note 16. Finance receivables).

5. Actuarial assumptions and methods

The liability for insurance contracts has been determined by Group's consulting Actuary, Peter Davies, ('the Actuary'), B.Bus.Sc., FIA, a Fellow of the New Zealand Society of Actuaries in accordance with NZ IFRS 4 'Insurance Contracts' issued by the External Reporting Board, and Professional Standard no. 20 of the New Zealand Society of Actuaries – Valuation of Life Insurance Policy Liabilities and no. 30 Valuation of General Insurance Claims. The liability equals the initial single premium, net of acquisition costs, written down on a straight line basis over the life of the policy.

The actuary is satisfied as to the nature and extent of the data used for the valuation.

The life insurance contract liabilities are subject to a loss recognition test, which has been carried out on the following basis:

Mortality:	Population mortality NZ2000 – 2002.	
Deaths:	Claim frequencies and terminations per company experience.	
Disability:	Claim frequencies and terminations per company experience.	
Redundancy:	Claim frequencies and terminations per company experience.	
Expenses:	\$50 (31 March 2016: \$138) per policy per year, escalating at 2% per annum (31 March 2016: 2%).	
Interest:	A discount rate of 2.14% per annum (31 March 2016: 1.95%).	
Cancellations:	Consumer credit contracts:	3.0% per month in months 1 to 10, reducing by 0.1% per month to 1.0% per month.
Surrender value	Rule of 78	

Claim provisions for notified claims have been determined using case estimates provided by the claims manager.

The provision for claims incurred but not reported (IBNR) has been determined by applying the chain ladder method to past claim reporting patterns.

Insurance contract liabilities for motor vehicle business have been calculated as the unearned premium net of deferred acquisition costs.

The basis for the loss recognition test in respect of motor insurance business is as follows:

Premium liability before risk margin and expenses:	45% of net unearned premium
Risk margin:	10%
Expense allowance:	40%
Surrender value	Straight line basis

Claim provisions for notified motor claims have been based on case estimates provided by the claim manager.

The provision for IBNR in respect of motor claims has been determined by applying the chain ladder method to past claim reporting patterns.

Under the accumulation method, insurance contract liabilities do not vary with changes in the valuation assumptions, unless a variation in the assumption would lead to the recognition of future losses. The sensitivity of changes in the valuation assumptions on the best estimate liability calculations, carried out as part of the loss recognition tests, is indicated in the following table:

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 MARCH 2017

5. Actuarial assumptions and methods (continued)

* Net of deferred acquisition costs

The best estimate is calculated on the basis of the "best estimate" of the net future cash-flows under insurance policies and exclude future profit. These profits are released to the income statement over the life of the policies and are included in the carrying amount of liabilities disclosed on the statement of financial position. The "best estimate" assumptions have been calculated using the assumptions set out above.

	2017 \$000's	2016 \$000's
Unlisted medical property investment company	<u>3,190</u>	<u>3,031</u>

The 10.47% stake in this company is held by Quest Insurance Group Limited. This investment was previously held by Pacific Rise Limited and was transferred at net book value to Quest Insurance Group Limited during August 2015. The investment in the unlisted medical property company is an available for sale financial asset and is measured at fair value. This investment is denominated in NZ dollars. The Directors have disclosed their intention to sell this investment. This equity security is not quoted in an active market. The fair value of this equity security is based on the Group's share of the entity's net assets at reporting date as reported in the entity's financial statements. The entity is a property investment company that is solely in the business of holding and leasing investment property under operating leases and is involved in the development of investment property. The majority of the entity's assets and liabilities are reported in their financial statements at either their fair value or their carrying value which approximates their fair value.

16. Finance receivables

	Note	2017 \$000's	2016 \$000's

Over 60 months	-	-
	<u>40,054</u>	<u>34,642</u>
Total	<u>64,077</u>	<u>54,576</u>

While the sale of the finance receivables to the Geneva Warehouse A Trust (the Trust) from Geneva Financial Services Limited constitute a legally enforceable sale and purchase transaction, it does not meet the criteria for the derecognition of financial assets under NZ IAS 39, 'Financial Instruments: Recognition and Measurement' (NZ IAS 39) and thus at the time of the sale does not meet the Group's accounting policy for derecognition of a financial asset. NZ IAS 39 establishes specific guidance for the derecognition of financial assets, such that a financial asset can only be derecognised when substantially all of the risks and rewards of ownership, measured by the change in the variability of the cash flow arising from the financial assets before and after the transfer, is transferred.

During the year ended 31 March 2017, finance receivables totalling approximately \$36.8m were sold to the Trust (2016: \$34.9m). As there has been no change in the management of the receivables and because there were no significant changes in the cash flows before and after the sale, the sold receivables did not meet the derecognition criteria. Furthermore, as the sales constitute legally enforceable transfer of equitable interest in the transferred receivables, the carrying values of these receivables at reporting date of \$51.9m are subject to limitations on disposal (2016: \$45.1m).

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 MARCH 2017

16. Finance receivables (continued)

During the year ended 31 March 2017, finance receivables totalling approximately \$5.9m were sold to Prime Asset Trust and \$2.6m repurchased, (March 2016: Nil). As there has been no change in the management of the receivables and because there were no significant changes in the cash flows before and after the sale, the sold receivables did not meet the derecognition criteria. Furthermore, as the sales constitute legally enforceable transfer of equitable interest in the transferred receivables, the carrying values of these receivables at reporting date of \$2.9m are subject to limitations on disposal (2016: \$0.6m).

While the sale of finance receivables to Prime Asset Trust Limited from Geneva Financial Services Limited constitutes a legally enforceable sale and purchase transaction, it does not meet the criteria for the derecognition of financial assets under NZ IAS 39 and thus at the time of sale does not meet the Geneva Financial Services Limited's accounting policy for derecognising of financial asset. NZ IAS 39 establishes specific guidance for the derecognition of financial assets, such that a financial assets can only be derecognised when substantially all of the risks and rewards of ownership of the financial asset have transferred and they are no longer controlled by the entity. The transfer of risks and rewards of ownership is measured by the change in the variability of the cash flow arising from the financial assets before and after the transfer.

All past due but not impaired assets fall between 0 and 30 days past due.

19. Securitisation

Geneva Financial Services Limited (GFSL) a wholly owned subsidiary of the Company has a wholesale funding arrangement with Westpac New Zealand Limited (Westpac) under which it securitised loan receivables through The Geneva Warehouse A Trust (the Trust). Under the facility, Westpac provided funding to the Trust secured by loan receivables transferred to the Trust from GFSL. The facility was for an initial term of two years and for a maximum amount of \$30,000,000. The facility annual review was completed during August 2016 and was extended to 31 July 2018. The current facility is \$45,000,000. The Trust is a special purpose entity set up solely for the purpose of receiving loans from GFSL with Westpac funding up to 83% of the purchase and the remainder being funded by a subordinated loan from the Company. The NZ Guardian Trust Limited, via NZGT (GF) Trustee Limited, has been appointed as Trustee for the Trust with GFSL as the sole beneficiary. Under NZ IAS 39, Financial Instruments: Recognition and Measurement and NZ IFRS 10: Consolidated Financial Statements, the Company controls the financing and operating activities of the Trust. As a result the Trust is required to be consolidated into the Group financial statements.

GFSL continues to administer the loans and collect loan instalments as they fall due. As GFSL retains all of the risks and rewards relating to the transferred loan receivables, the loan receivables do not qualify for derecognition under NZ IAS 39, 'Financial Instruments: Recognition and Measurement' and they continue to appear in the statement of financial position of GFSL.

During year ended 31 March 2017 GFSL transferred \$36.8m gross value of loans receivables to the Trust (2016: \$34.9m). As at 31 March 2017 the carrying value of these assets were \$51.9m (2016: \$45.1m).

Closing balance	1,400	1,082

23. Financial assets at fair value through profit or loss

Purchased debt

Purchased debt is typically past due and non-performing debt acquired by Stellar Collections Limited at a discount to face value. These debt instruments are not quoted in an active market. The fair value on the purchased debt is based on a valuation using discounted cash flow models performed by external valuers, Northington Partners. Key assumptions and inputs in the valuation include; a discount rate of 27.5% (2016: 27.5%), projected cash flows for four years based on historical collection rates of similar portfolios and collections costs. The discount rate reflects the mid point target rate of return of debt portfolios with similar risk profiles. The purchased debt was designated at fair value through the profit and loss upon initial recognition. The Group manages and evaluates the performance of these assets in accordance with a documented risk management strategy.

Sensitivity

For example, to the extent that management reduce or increase cash flow assumptions by 10% the fair value, of financial assets designated at fair value - purchased debt, would be estimated at \$415k (2016: \$554k) if reduced, \$535k (2016: \$705k) if increased, as compared to their reported fair value of \$475k (2016: \$630k) at reporting date, this would be recognised as a movement through the profit and loss.

Financial assets at fair value through profit or loss

	2017 \$000's	2016 \$000's
Purchased debt	475	630
	475	630
Maturity profile of financial assets designated at fair value:		
	2017 \$000's	2016 \$000's
Current - within 12 months		
- Purchased debt	156	184
	156	184
Non - Current - more than 12 months		
- Purchased debt	319	446
	319	446
Total	475	630

24. Taxation**a) Deferred income tax**

	2017 \$000's	2016 \$000's
Deferred tax assets		
To be recovered within one year	1,389	1,796
Later than one year	1,725	-
	<u>3,114</u>	<u>1,796</u>

The gross movement on the deferred income tax account is as follows:

	Provisions \$'000	Tax losses \$'000	Total \$'000
Balance at 31 March 2015	646		646
(Charged) / Credited to profit or loss	1,150		1,150
Balance at 31 March 2016	<u>1,796</u>	-	<u>1,796</u>
(Charged) / Credited to profit or loss	690	628	1,318
Balance at 31 March 2017	<u>2,486</u>	<u>628</u>	<u>3,114</u>

Deferred income tax assets are recognised to the extent that the realisation of the related tax benefit through the future taxable profits is probable. As the Group has generated taxable profits for the current year and is forecasting profits for the foreseeable future, the Directors considered it probable that a deferred tax asset would be realised.

The following deferred tax assets have not been recognised in the statement of financial position but are available for utilisation against future taxable income:

	Tax Losses		Temporary Differences	
	Gross \$'000	Tax Effectuated \$'000	Gross \$'000	Tax Effectuated \$'000

Solvency disclosure - Quest Insurance Group Limited

The solvency position of the Company as at 31 March 2017 has been calculated by the Company's actuary, under the Reserve Bank of New Zealand solvency standard (Section 55 of the Insurance (Prudential Supervision) Act 2010). The actual solvency capital of the Company under this standard as at 31 March 2017, net of related party investments and unrecoverable deferred acquisition costs amounted to \$7.53m (2016:\$6.39m). Quest Insurance Group Limited is required to hold minimum solvency capital of \$5.0 million and have a solvency margin of at least \$1.

2017	Non Life \$'000	Life \$'000	Total \$'000

During the prior period the Company settled \$5.2m of professional investors funding. At the same juncture \$3.29m was reinvested and an additional \$1.56m funding was raised. (These transactions includes two directors, David Smale and Robin King)

* \$0.45m was repaid to David Smale and \$0.4m was reinvested;

* \$1.35m was repaid to Robin King, \$1.35m was reinvested and an additional \$0.65m was invested.

Both loans were on a three year term @ 9% interest per annum.

32. Capital and reserves

Capital:

Capital comprises share capital, other reserves, and retained earnings.

Share capital (comprised of ordinary shares only):

	Ordinary shares (in thousands)	
	2017 000's	2016 000's
Opening balance	70,435	69,007
Placement of new shares via execution of executive share options *	-	1,428
Closing balance	<u>70,435</u>	<u>70,435</u>
	2017 \$000's	2016 \$000's
Opening balance	51,287	50,764
Placement of new shares via execution of executive share options *	-	523
Closing balance	<u>51,287</u>	<u>51,287</u>

All issued shares are authorised and fully paid. The holders of ordinary shares rank equally amongst themselves, are entitled to receive dividends from time to time and are entitled to one vote per share at shareholder meetings of the Company and rank equally with regard to the Company's residual assets. A special dividend of 1.5 cents was paid in August 2016. A final dividends of 2 cents was declared for the March 2017, payable on 30 June 2017.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 MARCH 2017

32. Capital and reserves (continued)** Placement of new shares via execution of executive share options*

During the prior period the executive team executed share options that were issued on 7 August 2015. In total 10,000,000 new ordinary shares were issued @ 3.8 cents per share (Refer note 34).

These transactions are summarised as follows:

	2017 \$000's	2016 \$000's
Issue of 1,000,000 ordinary shares in Geneva Finance Limited on 17 November 2015 @ 3.8 cents per share.		38
Issue of 9,000,000 ordinary shares in Geneva Finance Limited on 2 March 2016 @ 3.8 cents per share.		342
	-	380
Consideration received on 17 November 2015		(38)
Consideration received on 3 March 2016		(342)
	-	(380)
Balance recognised in profit or loss	-	380
Share issue costs incurred and recorded directly in equity against share capital.		2

Hedging reserve:

The hedging reserve relates to the fair value of the effective portion of cash flow hedges (Refer note 29).

Available for sale equity reserve:

The available for sale reserve relates to revaluation of an equity investment held by the subsidiary company Quest Insurance Group Limited.

The equity investment was initially acquired for a cost of \$2.2m. The available for sale reserve represents the difference between the initial cost and the fair value at reporting date of \$3.2m (2016: \$3.0m) being \$1.0m (2016: \$0.8m)

33. Profit / (Loss) per share*Basic profit / (loss) per share*

The calculation of basic profit per share at 31 March 2017 was based on the profit attributable to ordinary shareholders of \$5,133,000 (2016: \$3,529,000) and a weighted average number of shares 70,435,275 (2016: 69,161,659) calculated as follows:

Profit / (loss) attributable to ordinary shareholders

	2017 \$000's	2016 \$000's
Net profit / (loss) after taxation	5,133	3,529
Dividends on preference shares	-	-
Net profit / (loss) attributable to ordinary shareholders	5,133	3,529

Weighted average number of ordinary shares

	2017	2016
Weighted average number of ordinary shares in issue (thousands)	70,435	69,162

Diluted earnings per share is calculated by adjusting the weighted average number of ordinary shares outstanding to assume conversion of all dilutive potential ordinary shares. The company only had outstanding share options in the prior year. A calculation is done to determine the number of shares that could have been acquired at fair value based on the monetary value of the subscription rights attached to outstanding share options. The number of shares calculated above is compared with the number of shares that would have been issued assuming the exercise of the share options.

No diluted earnings per share was presented for in the prior year as the average share price of the Company's shares over the reported periods was lower than the exercise price of the share options on issue.

On 7 July 2016, every 7 shares held in the Company was consolidated into 1 share, with all fractional entitlements rounded up. Prior year values were restated to reflect the comparable consolidated number of shares.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 MARCH 2017

34. Share options*Share options issued to employees*

During August 2015, 10m share options were granted to the managing director and senior management of the Company. The exercise price of the granted options is 3.8 cent per share. Options must be exercised not later than 30 March 2018 and the options will be forfeited if the employee ceases to be employed by the Company. All of these options were exercised during the period.

The weighted average fair value of the options granted during the period were determined using the Binomial Tree option pricing model was 1.45 cents per option. The significant inputs into the model were, share price of 3.2 cents at the grant date, exercise price shown above, volatility of 78.65%, an expected option life of 2.65 years, and an annual risk-free interest rate of 2.7%. The volatility measured at the standard deviation of changes in the Company's share price over the prior 12 month period. The share based payment for the period is \$145k. No such share options were issued during the period ended 31 March 2017.

Share options issued as part of the Company's Non-Renounceable Rights Issue of Ordinary Shares and Options

On 19 and 23 November 2012, 140k of share options were granted as part of the Company's Non-Renounceable Rights Issue of Ordinary Shares and Options (the 'rights issue'), refer also Note 32. Under the rights issue the Company issued 56.2m ordinary shares at 2.75 cents per share. For every 3 new ordinary shares issued the Company issued 2 share options which entitle the holder to subscribe for new shares. These options can only be exercised during a 30 day period, commencing 3 years from the date of issue. The exercise price of the granted options is 8 cents per share. All of these options were forfeited during November 2015.

Movements in the number of share options outstanding and their related weighted average exercise prices (if applicable) are as follows:

	31 Mar 17		31 Mar 16	
	Average Exercise price (cents)	Options (thousands)	Average Exercise price (cents)	Options (thousands)
At 1 April	-	-	7.27	49,449
Granted			3.80	10,000
Forfeited			7.27	(49,449)
Exercised			3.80	(10,000)
Expired	-	-	-	-
At period end	-	-	-	-

Share options outstanding at the end of the year have the following expiry dates and exercise prices.

Expiry Date	Exercise price (cents)	Share Options (thousands)	
		31 Mar 17	31 Mar 16
2015	5.00	-	-
2015	8.00	-	-
		-	-

35. Management of financial, insurance and capital risk**Financial Risk****(a) Credit risk**

Credit risk is defined as the risk that a loss will be incurred if a counter party to a transaction does not fulfil its financial obligations.

Credit risk is the potential loss arising from the non-performance of a counterparty to whom funds have been advanced. Financial instruments, which potentially subject the Group to credit risk principally, consist of bank balances, finance receivables, accounts receivable and interest rate swaps.

The board, audit and risk committees have the responsibility to oversee all aspects of credit risk assessment and management, and delegates authority to perform lending within approved lending policies and guidelines.

35. Management of financial, insurance and capital risk (continued)**Financial Risk (continued)****(a) Credit risk (continued)**

To control the level of credit risk taken each customer's credit risk is individually evaluated on a case by case basis and the amount of collateral taken on the provision of financial facility is based on management's credit evaluation of the customer. The collateral taken varies and as at reporting date was primarily in the form of motor vehicles and/or household chattels. Loan agreements provide that if an event of default occurs, collateral can be repossessed. The repossessed collateral is either held until overdue payments have been received or sold in the secondary market. An asset quality committee operates and overdue loans are assessed and reviewed on a regular basis by this body.

To facilitate effective management of arrears accounts, loan receivables are grouped on the number of days in arrears and number of days without making a payment. All overdue accounts are managed by the collections team who have responsibility for securing the Group's position. Collection processes includes telephone contact, standard arrears letters, and if the arrears position deteriorates an escalation through the legal process.

The Group performs credit evaluations on all customers requiring advances. The Group requires collateral or other security to support financial instruments with credit risk. The Group operates a lending policy with various levels of authority depending on the size of the loan. A lending and credit committee operates and overdue loans are assessed on a regular basis by this body.

The Group's credit risk to cash and cash equivalents represents the potential cost to the Group if counterparties fail to fulfil their obligation. To control the level of credit risk taken, the Group only banks with registered banks.

The Group's credit risk to interest rate swaps represents the potential cost to replace the swap contracts if counterparties fail to fulfil their obligation. To control the level of credit risk taken, the Group only enters into interest rate swaps with its term facility provider.

i) Concentrations of credit risk

The Group lending consists of consumer lending (including personal loans) and commercial lending spread across a large number of borrowers in New Zealand. As such there is no material concentration of credit risk to individual borrowers. All finance receivables net of provisions are considered to be fully recoverable.

ii) Concentration of credit risk by 'sector' and by 'sector and then asset category'

Finance receivables consist of secured and unsecured business loans and secured and unsecured personal loans. The security on business loans is generally the assets being purchased, typically equipment. The security on personal loans is generally the assets being purchased, typically motor vehicles or chattels. It is impractical to determine the current fair value of the collateral held due to the large number of loans, average size, term to maturity, wide variety and condition of each collateral item.

Concentration of credit risk by sector

	2017 \$000's	2016 \$000's
<i>Personal Loans</i>

35. Management of financial, insurance and capital risk (continued)

Financial Risk (continued)

b) Interest rate risk and liquidity risk

Interest rate risk

Interest rate risk is the risk of loss to the Group arising from adverse changes in the interest rates. The Group is exposed to interest rate risk in respect of borrowing funds and lending to customers.

The expected maturity periods and effective interest rates of debt securities are set out in the liquidity gap and interest rate sensitivity analysis. The interest rates are fixed depending on the term and value of the professional investor loans.

Interest rates are managed by assessing the demand for funds, new lending, expected debt repayments and maintaining an adequate portfolio of financial assets and liabilities with a sufficient spread between interest rates on the Group's lending and borrowing. Rates are fixed for lending over the term of the contract. The Group's term facilities have a floating interest rate. To protect the Group from interest rate volatility on this facility the Group enter into interest rate swaps to hedge at least 40% of the interest rate risk. The Group agreed with other parties to exchange, at specified intervals (monthly), the difference between floating contract rates and fixed rate interest amounts calculated by reference to the agreed notional principal amounts. The Group has not entered into any other derivative transactions.

Changes to interest rates can impact on the Group's financial results by affecting the spread earned on the interest-earning assets and the cost of interest-bearing liabilities.

Interest rate risk is measured by the Executive Directors when establishing fixed rates of interest for issues of debt securities. When approving interest rates for individual loan advances, interest rate risk is either measured by the Executive Directors in accordance with the approved lending policy or by management in accordance with the approved lending policy. The Executive Directors monitor exposure to interest rates on a monthly basis.

Interest rates on advances are normally fixed for the life of the advances.

Liquidity risk

Liquidity risk is the risk that the Group will encounter difficulty to raise funds on short notice to support the subordinated requirement to sustain securitisation facility growth. The Group monitors its liquidity position on a continuous basis and plans its operating activities to ensure a balanced liquidity position. The key factors in managing liquidity are the timing of the payments of interest and principal on funding and the timing of receipts of interest and principal on finance receivables. The Group has also reduced its liquidity risk through:

- securing the securitisation facility
- securing a term facility with Kiwi Bank
- sourcing debt from professional investors
- actively searching for alternative funding sources; and
- managing its operations to operate within available resources.

i) Liquidity gap

The following maturity analysis of financial assets and financial liabilities is based on the remaining period to contractual maturity. Managements' expected maturities of the financial assets and financial liabilities are in line with the contractual maturities unless otherwise noted below.

The Group monitors its liquidity position on a continuous basis and plans its operating activities to ensure a balanced liquidity position. If necessary the Group will build up cash reserves to meet longer term liabilities.

iii) Interest rate sensitivity analysis

The following tables summarise the sensitivity of the Group's financial assets and financial liabilities to interest rate risk. The analysis shows the annualised impact on the profit before tax and equity of a reasonably possible movement of +/- 1% movement in interest rates. The equity impact takes into the account tax effect of the profit impacts. The tax effect is \$Nil for the year ended 31 March 2017 (2016: \$Nil) due to the fact that the Group has sufficient accumulated tax losses available for utilisation against future taxable income (provided the Group generates sufficient assessable income, and the statutory requirement for shareholder continuity being met, also refer Note 24).

c) Fair value financial assets and liabilities*i) Fair values*

The carrying value of all financial assets and liabilities not measured at fair value approximates their fair values as they are either short term in nature, rate insensitive and subject to impairment.

ii) Fair value hierarchy

NZ IFRS 13 specifies a hierarchy of valuation measurements based on whether the inputs to those valuation techniques are observable or unobservable. Observable inputs reflect market data obtained from independent sources; unobservable inputs reflect the Group's market assumptions. These two types of inputs have created the following fair value hierarchy:

- Level 1 - Quoted prices (unadjusted) in active markets for identical assets or liabilities. This level includes listed equity securities and debt instruments on exchanges (for example, New Zealand Stock Exchange) and exchanges traded derivatives like futures (for example, Nasdaq, S&P 500).
- Level 2 - Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices). This level includes the majority of over the counter derivative contracts, traded loans and issued structured debt. The sources of input parameters for yield curves or counterparty credit risk are Bloomberg or Reuters.
- Level 3 - Inputs for assets and liabilities that are not based on observable market data (unobservable inputs). This level includes equity investments and debt instruments with significant unobservable components.

This hierarchy requires the use of observable market data when available. The Group considers relevant and observable market prices in its valuations where possible.

35. Management of financial, insurance and capital risk (continued)

Financial Risk (continued)

d) Foreign exchange risk

Foreign exchange risk is the risk that the Group may suffer a loss through adverse movement in the exchange rate. The Group has no material exposure to foreign exchange risk.

Insurance risk

The Group assumes insurance risk through its general insurance activities. The risk is the possibility that the insured event occurs and the uncertainty of the amount of the resulting claim. The risk is random and unpredictable. The key risk arises in respect of claim costs varying from what was assumed in the setting of premium rates.

The primary objective in managing insurance risk is to enhance the financial performance of the Group, to reduce the magnitude and volatility of claims and to ensure funds are available to pay claims and maintain the solvency of the business if there is a negative deviation from historical performance.

Policies, processes and methods for managing insurance risk are as follows:

- the use of reinsurance policies to limit the Group's exposure;
- pricing of policy premiums to ensure alignment with the underlying risk; and
- regular monitoring of the financial results to ensure the adequacy of policies.

The financial results of the Group are primarily affected by the level of claims incurred relative to that implicit in the premiums. The assumptions used in the valuation of the outstanding claims liability and the liability adequacy test directly affect the level of estimated claims incurred.

The scope of insurance risk is managed by the terms and conditions of the policies. The level of benefits specified is the key determinant of the amount of future claims although the exact level of claims is uncertain.

Capital risk management

The Group's objectives when managing capital are to safeguard the Group's ability to continue as a going concern in order to provide returns for investors and benefits for the other stakeholders and to maintain an optimal capital structure to reduce the cost of capital. The components of Capital that are managed by the Group are share capital, retained earnings and other reserves.

Being in the finance sector the Group assesses the sufficiency of capital to remain a going concern against the risk expected or unexpected losses arising from lending and insurance operations on a regular basis. In order to maintain or adjust the required capital structure the Group may issue new shares or sell assets to reduce debt.

Group company Quest Insurance Group Limited has a minimum solvency requirement of greater than zero (2016: Greater than zero). Effective 31 March 2017 Quest Insurance Group Limited also have a minimum qualifying capital of \$5.0m. The Group has complied with these externally imposed capital requirement during the period.

There are no other externally imposed capital requirements that the Group is required to adhere to.

Aggregate term liabilities	36,358	27,507

39. Segment analysis**a) By operating segment**

The Group's reportable operating segments are as follows:

- Corporate: The operations of this segment include the raising of debt and the advancing loans to other operating segments within the Group.
- New Business: The operations of this segment include the lending of money to individuals, companies and other entities and have a wholesale funding arrangement with Westpac New Zealand Limited (Westpac) under which it securitised loan receivables.
- Insurance: The operations of this segment include the issuing of temporary insurance contracts covering death, disablement and redundancy risks and short term motor vehicle contracts covering comprehensive, third party, mechanical breakdown risk and guaranteed asset protection.
- Old Business: The operations of this segment include the collection and management of money lent to individuals, companies and other entities originally originated by the Group and external debt collection.
- Property: The operations of this segment included the holding of a property investment and raising debt to advance to Corporate segment. During the prior period the property investment property was transferred to the Insurance segment.

Each Group operating segment is operated as a discrete business unit and transactions between segments are on normal commercial terms and conditions. The eliminations arise from transactions between the Group segments and are predominantly interest, commission/brokerage, marketing subsidy and debt collection charges.

None of the Group's operating segments place any reliance on a single major customer amounting to 10% or more of the applicable segments revenue.
